

Measles, Mumps and Rubella

Three diseases, one vaccine!

3-in-1 protection

The MMR vaccine protects against 3 highly contagious diseases: **measles, mumps and rubella**.

About the vaccine

The MMR vaccine is the most effective way to prevent measles, mumps and rubella, and their potentially serious consequences. The vaccine is safe, with very few side effects.

How does the vaccine work?

The MMR vaccine trains your child's immune system to fight off diseases by producing their specific antibodies.

When can my child get the MMR vaccine?

It's given in **2 doses**. The timing depends on the vaccination schedule in your country, so check with your family doctor.

Don't delay—contact your healthcare provider to discuss your child's MMR vaccination today!
