

It's the season for respiratory viruses!

Flu (influenza)

COVID-19

RSV

(respiratory syncytial virus)

These viruses spread easily through the air and can lead to serious illness.

Who is most at risk?

Flu, COVID-19 and RSV can cause severe complications for:

- Older people
- Young children
- People with chronic health conditions
- Pregnant women

**Vaccination is the best way to
prevent severe disease caused
by COVID-19, flu and RSV.**

**People who are vaccinated are less
likely to experience severe disease, or
need to go into hospital.**

***So don't wait — talk to your
doctor and book your vaccination!***
